DALDOSS GOODS ATTENDANT FREIGHT LIFT

Microfreight®

Microfreight introduction

The freight lift Microfreight Daldoss offers the strong and reliable solution for the transport of goods only as **Microfreight Classic** as well as goods with passengers as **Microfreight Plus**. Particularly suitable to industries and any other environment where the handling of heavy goods is needed.

a product certified by

daldoss microfreight the strong freight lift to handle heavy goods

Microfreight[®] Classic Microfreight[®] Plus

Operation

Accuracy

The electrical traction drive grants superior perfomance and high level of quietness in motion.

The mircroprocessors controller can be personalized with the option of VVVF speed adjustment of the car allowing for a highly accurate floor levelling of heavy goods. Standard feature to temporarily reserve the car at floor to ease the load/download operations. Optional key in the car and light curtains for use as "goods only".

Plus Version

Å∎

Turnkey Installation

The required pit of only 150 mm and the reduced headroom, together with the standard supporting structure with steel plate cladding as an option, reduce to the minimum the masonry works required for the installation.

Finishes and options

Ample choice of colours and options to design the perfect lift for your

Personal Configuration Goods with Attendant Ideal for Industries

lift can, for the majority version, the option to of models, be free accompany the goods of anchoring point for up to two attendants and/or in an outdoor in the car to simplify the environment like, for load-unload operations.

capacity both in terms of encumbrance as well as of weight makes easy the handling goods inside warehouses.

main advantages

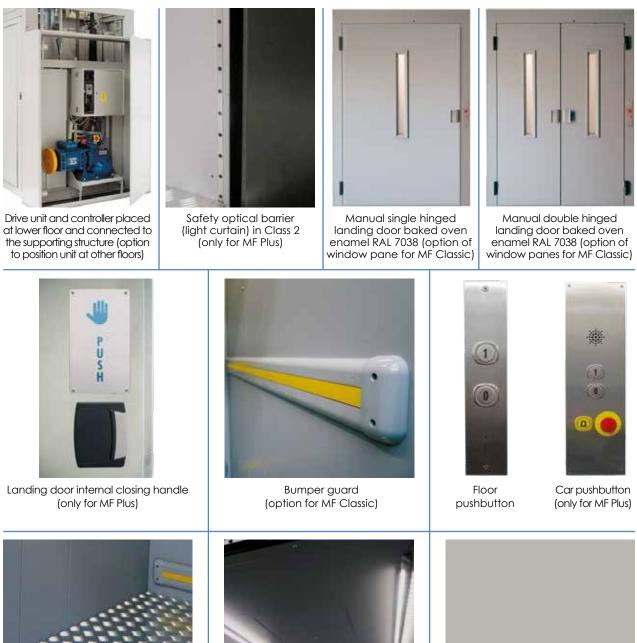

Technical features

tf

Daldoss Microfreight is the freight lift for the transport of heavy goods accompanied by maximum two persons.
